CPC's Sons & Daughters Scholarship Winners

Two Local Students Among 29 Global Recipients

St. Paul, Minn. – June 28, 2021 – Two Minnesota students are among 29 recipients worldwide of scholarships from the Dover Sons and Daughters program. The students are children of [CPC \(Colder Products Company\)](#) employees. Based in Roseville, Minn., CPC is an operating company within Dover, a diversified global manufacturer with an annual revenue of approximately \$7 billion.

Ian Paterson, son of CPC employee Kip Paterson, is a 2021 graduate of Lakeville North High School in Lakeville, Minn. Stuart Pearson, son of employee James Pearson of Falcon Heights, Minn., attends Iowa State University majoring in electrical engineering.

A committee of college admissions professionals selects the winners based on academic excellence, leadership abilities and extracurricular activities. Winners are eligible to receive up to \$10,000 in scholarship support over four years of their undergraduate education.

Stuart Pearson said the scholarship will help him pursue his interests around renewable energy and his goal of “a more sustainable world.” Ian Paterson will major in computer engineering at the University of Minnesota. “I’m really thankful for the Dover scholarship as it’ll allow me to pursue research and broader opportunities as I further my education.” Ian’s dad, Kip, added, “There are so many reasons to love working at CPC, and the benefits are definitely key. We’re grateful for the generous gift from Dover.” Now in its tenth year, the Dover program has made 343 awards totaling \$2.3 million.

CPC also offers a separate scholarship program for all employees’ dependents who are pursuing education after high school. Students attending a two or four-year college, university or vocational/technical school are eligible for \$1,200 annually during their continued enrollment in an accredited institution.
